1	68137044AA	FUSE					(N/C)

14316
Check cooling fan operation. In-op fuse blown. Inspect wiring. No wiring issues found. Found fan #2 has amprage draw that spikes above 40 amps at times, above fuse rating. Internal fan motor winding fault. Need fan assembly. Fan serviced in pieces, recheck each piece. Found both motors exceed 40 amp draw at times. Also found fan module wiring has erratic resistance on ground .02 to 1.8. Needs both motors and wiring jumper for fans, vehicle is first responder. R&R both cooling fan motors and fan module wiring jumper harness. Installed new fuse and check fan operation. Okay at this time.
